# 01. FINDING ELECTION SETUPS

---

When looking for stocks that are about to explode we need to see evidence of 'Big Money Footprints'. The more the better.

Here is a quick summary of what you need to look for:

## 1. Recent Volume Acceleration

The basic laws of supply and demand. Big money moving in or out of stocks will create imbalances that will lead to price movement. The key is to identify exactly the type of imbalance and then pick the lowest risk time to make your move.

## 2. Recent Price Acceleration

Recent Big Money must have moved the price in a significant way. This means the big money would have been aggressive and with a purpose. This tees up further movement if other key markers are satisfied.

## 3. Key Levels

The trading world is packed with thousands of support and resistance theories. We like to keep things simple and focus only on those that will attract the most attention from professional and amateurs alike.

## 4. 'Hidden' Leveraged Money

Our secret source of information. If you know what the leveraged professionals are doing, then the odds of a favourable move are dramatically enhanced. Align with the other key big money markers and our 4-step E.D.G.E trading plan, and you have a system for life.

## 5. Shrinking Retracements

Here's supply and demand exposed again, this time with medium-term price action. Here you can clearly see who's winning the battle between buyers and sellers.

## 6. Price and Volume Consolidation

When price consolidates together with volume it typically means there's not much activity going on. This can have profound implications on the broader picture. And that's not all ... This pattern can also be used as a risk-management tool.

# 02. THE E.D.G.E TRADE PLAN

---

You cannot expect to achieve top trading performance without having a robust, solid trading plan.

Our trading plan is designed specifically to achieve four key outcomes:

- **E**nter every trade with complete control so you only enter the right setup in the right way, with your maximum risk known in advance.
- Protect (or **D**efend) your profitable positions early so you never allow a decent profit to turn into a loss.
- **G**row your account by ensuring you can ride your best performing stocks into windfall profits when they trend.
- Only trade an **E**videnced, proven system

When you put all these pieces together, you will become the consistent trader you really want to be.

And what's more is that this works for any experience level and any account size. It's helped traders like Chloe from Malaysia turn her \$3,000 account into \$30,000 in under 18 months. If you would like to know more about how we find explosive setups and the E.D.G.E trading plan, you can [book a session with one of our experienced trading coaches here.](#)

# 03. THE ULTIMATE ELECTION STRATEGY

---

This upcoming election could have profound implications for the stock market, as each candidate brings contrasting economic and regulatory approaches.

- **Harris Win:** Expect a continued focus on green energy, healthcare expansion, and tech regulation. Renewable energy and electric vehicle companies could see significant gains, while traditional energy sectors may struggle under tighter regulations.
- **Trump Win:** A return to his pro-business approach would likely boost fossil fuel industries, defense, and financial sectors. However, sectors related to renewable energy and healthcare might face increased volatility as regulations are rolled back.

Yet, amidst these potential outcomes, there's one group that is guaranteed to win: **the insiders in Congress**. Known as the "Capitol's stock-trading ring," they have an uncanny ability to leverage privileged information to outperform the market consistently.

With 97 members of Congress trading on companies influenced by their committees, it's no wonder that over half of Congress are millionaires. In 2023 alone, 32 members beat the S&P 500—some by as much as 10X!

It may seem unfair, but as political author Peter Schweizer notes, these insiders have access to information that few others do. They're poised to make significant gains, no matter the election outcome.

So, if you can't beat them, why not join them?

[Watch the replay of the exact election trading strategy I recently shared with my members and discover how you too can turn the election into a win-win.](#)

# 04. 'TRUMP TRADES' WATCHLIST

---

A Trump win would signal a return to his pro-business, deregulatory stance, likely benefiting traditional energy sectors like oil, gas, and coal, as well as defense and industrials, which tend to perform well under a Republican administration, and also financials.

Conversely, sectors tied to renewable energy or healthcare reform could see increased volatility as Trump is likely to roll back environmental protections and healthcare policies implemented under the Biden-Harris administration.

In this section, I've highlighted 5 stocks to watch for potential election profits in the event of a Trump victory on 5 November.

Remember, we only trade confirmed breakouts as per the E.D.G.E Trade Plan.

Take a look at the charts and see if you can spot the 'Big Money Footprints'.

# FORD MOTOR COMPANY

This automobile giant that was punished in its last earnings report, but would be a winner in a Trump administration that would empower US manufacturers. Already finding support, if it can break its 1-month highs in conjunction with a Trump win, better times could be ahead.

## Company Description

Ford Motor Company (commonly known as Ford) is an American multinational automobile manufacturer headquartered in Dearborn, Michigan, United States. The company sells automobiles and commercial vehicles under the Ford brand, and luxury cars under its Lincoln brand.

# 05. 'HARRIS HEDGE' WATCHLIST

---

In the event of a Harris win, expect a continuation and expansion of the Biden administration's policies, particularly in green energy, healthcare, and technology regulation. Harris has been a strong advocate for environmental initiatives, so renewable energy companies, electric vehicle manufacturers, and industries focused on sustainability would likely see a boost.

Conversely, fossil fuel sectors such as oil, gas, and coal could face tighter regulations, which might negatively impact their stock performance.

In this section, I've highlighted 5 stocks to watch for potential election profits in the event of a Harris victory on 5 November.

Remember, we only trade confirmed breakouts as per the E.D.G.E Trade Plan.

Take a look at the charts and see if you can spot the 'Big Money Footprints'.

# BROOKFIELD RENEWABLE

An environmentally friendly utilities stock that is pulling back from near-year highs and should benefit from a Harris victory. It won't look so good though if she loses.

Each of the stocks included in this section were highlighted in a previous edition of this report WEEKS BEFORE they made explosive moves.

Take a look back at the charts to see if you can spot the 'Big Money Footprints' that were present. Then check out what moves came as a result!

Of course, not all stocks highlighted in this report will make explosive moves. Some may never breakout and some may result in losses.

That's where our E.D.G.E Trade Plan comes in...

Remember we only trade confirmed breakouts. If there is no breakout, there is no trade. No trade means no loss.

For trades you do take, always make sure you know your trade plan beforehand. As a reminder, E.D.G.E stands for...

- **E**nter every trade with complete control so you only enter the right setup in the right way, with your maximum risk known in advance.
- Protect (or **D**efend) your profitable positions early so you never allow a decent profit to turn into a loss.
- **G**row your account by ensuring you can ride your best performing stocks into windfall profits when they trend.
- Only trade an **E**videnced, proven system

Following this simple trade plan will help you manage your risk with confidence and put you in control of the trade.
